

Plastic Blowpipe Welding Tool

This plastic blowpipe welding tool is designed for diverse applications. It features adjustable temperature settings and operates on a 220V voltage.

Product Overview

Professional Plastic Welding Solution

This versatile plastic blowpipe welding tool is engineered for precision and reliability in various industrial applications. Featuring adjustable temperature settings and multiple power configurations, it offers flexibility for different welding requirements. Available in both standard and DC motor variants, this tool is designed to handle demanding tasks with consistent performance.

Technical Specifications

Power Options

500 W

Standard Power

700 W

Max Power

Operating Voltage	220V
Nozzle Diameter	9mm / 6mm
Temperature Range	50°C - 600°C (Model dependent)

Model Variants

Available Models	HC-500, HC-700, HC-700t, HF-500, HF-700, HF-700t
