

Plastic Extrusion Machine

This high-performance plastic extrusion machine is designed for efficient and precise plastic processing. It is suitable for manufacturing plastic profiles, tubes, and sheets.

Overview

High-Performance Plastic Extrusion

This high-performance plastic extrusion machine is engineered for efficient and precise plastic processing. It features a robust extruder, an advanced control system with a user-friendly interface, and an integrated cooling system to ensure consistent, high-quality output. Designed for versatility, this machine is ideal for manufacturing plastic profiles, tubes, and sheets.

Technical Features

Key Components

- Robust extruder unit
- Advanced control system
- Integrated cooling system
- Material hopper
- Precision die head

Operational Highlights

Continuous Feeding • User-Friendly Interface • High-Precision Processing

Applications

Suitable Applications

Plastic Profiles, Plastic Tubes, Plastic Sheets
