

Plastic Film Blowing Machine

This plastic film blowing machine is designed for efficient production of polyethylene films. It features a multi-layer extrusion system with precise temperature control and automatic winding mechanism.

Product Overview

High-Performance Film Production

This high-performance plastic film blowing machine is engineered for the efficient production of high-quality polyethylene films. It features a sophisticated multi-layer extrusion system paired with precise temperature control and an automatic winding mechanism to ensure consistent output. Built with a robust steel frame and an advanced control panel, it is designed for reliability and operational ease in demanding industrial environments.

Technical Capabilities

Core Features

- Multi-layer extrusion system
- Precise temperature control
- Automatic winding mechanism
- Robust steel frame construction
- Advanced control panel

Material Compatibility

Polyethylene

Suitable Applications

Packaging, Agricultural, Industrial
