

Plastic Film Blowing Machine

This high-performance plastic film blowing machine is designed for efficient production of polyethylene film. It features a robust extrusion system, an advanced die head for uniform film thickness, and a precise winding mechanism for consistent roll formation.

Product Overview

High-Performance Film Production

This plastic film blowing machine is engineered for the efficient, high-volume production of polyethylene film. It features a robust extrusion system and an advanced die head designed to maintain uniform film thickness throughout the production cycle. With a precise winding mechanism and an intuitive control panel, operators can easily monitor and adjust key parameters like temperature, speed, and pressure for consistent, high-quality results.

Technical Specifications

Core Features

- Robust extrusion system
- Advanced die head for uniform thickness
- Precise winding mechanism
- Integrated control panel for parameter monitoring

Suitable Applications

Packaging Film, Industrial Film, Polyethylene Production

Operational Parameters

Monitored Parameters

Temperature • Speed • Pressure
