

Plastic Film Blowing Machine

This high-performance plastic film blowing machine is designed for efficient production of polyethylene film. The robust machine features a multi-layer extrusion system, precise temperature control, and automated winding capabilities.

Product Overview

High-Performance Film Production

This high-performance plastic film blowing machine is engineered for the efficient production of high-quality polyethylene film. It features a robust multi-layer extrusion system, precise temperature control, and automated winding capabilities to ensure consistent thickness and quality. It is an ideal solution for manufacturing a wide range of packaging and agricultural films for industrial applications.

Technical Features

Automation

Automated Winding • Precise Temperature Control

Extrusion System

Multi-layer extrusion system

Applications

Suitable Film Types

Packaging Films, Agricultural Films, Industrial Films

Material Compatibility

Polyethylene (PE)
