

Plastic Film Crusher for Recycling

This film crusher is designed for efficient size reduction of plastic film materials. It features a robust cutting chamber with hardened steel blades and a powerful electric motor.

Overview

Heavy-Duty Plastic Film Crusher

This industrial-grade plastic film crusher is engineered for efficient size reduction of various plastic film materials. It features a robust cutting chamber equipped with hardened steel blades and a powerful electric motor designed for continuous, reliable operation. The system includes an optimized feeding mechanism and integrated safety features, making it an essential solution for professional recycling and waste management facilities.

Technical Specifications

Crushing Chamber Dimensions

Model Variant	Size Range
Standard	600-800
Large	1000-1200

Suitable Applications

Plastic Film Recycling, Waste Management, Size Reduction

Key Features

Core Features

- Hardened steel blades for durability
- Powerful electric motor
- Optimized continuous feeding mechanism
- Integrated safety interlocks
- Efficient discharge system
