

Plastic Injection Molding Machine

This high-performance injection molding machine is designed for plastic and rubber manufacturing. The robust machine offers precise control and efficient operation for producing a wide range of molded parts.

Overview

High-Efficiency Injection Molding

The GEKW/S series represents a modern advancement in plastic injection molding technology, utilizing a high-performance servo motor driving control system. This design significantly enhances injection precision while offering substantial energy and water savings. It serves as a robust solution for industrial plastic and rubber manufacturing, ensuring consistent quality and high throughput for demanding applications.

Performance

Performance Metrics

100 %

Energy Efficiency Rating

Drive System	Servo motor driving control system
Key Benefits	Energy Saving, Water Saving, High Precision, Consistent Quality

Applications

Suitable Materials

- Plastic
- Rubber
