

Plastic Injection Molding Machine

This plastic injection molding machine is designed for efficient and precise manufacturing. It features a robust clamping unit and an advanced injection unit for consistent material delivery.

ADDITIONAL IMAGES

Overview

K-Series high-efficiency injection molding machine designed for versatile industrial applications.

High-Precision Injection Molding Series

This European-style plastic injection molding machine is engineered for high-performance production, featuring advanced servo motor technology and robust hydraulic systems. Designed for precision, the machine is ideal for manufacturing automotive components and complex industrial plastic parts with consistent quality. Its modular construction and energy-efficient design provide a scalable, cost-effective solution for demanding production environments.

Key Metrics

Performance Highlights

15000 kN

Max Clamping Force

14074 cm³

Max Shot Volume

87 tons

Max Machine Weight
