

Plastic Machine Tool Wand

Durable plastic wand designed for various applications in machine-tools and tools. This wand is constructed from high-quality plastic, ensuring longevity and resistance to wear.

Product Overview

Durable Plastic Machine Tool Wand

This high-quality plastic wand is designed for versatility and durability in various machine-tool and tooling applications. Its lightweight construction significantly reduces user fatigue while maintaining the structural integrity required for demanding tasks. Featuring a smooth surface and precise dimensions, it serves as an excellent component for use as an extension or guide in professional machinery setups.

Physical Characteristics

Material	High-quality plastic
Surface Finish	Smooth

Key Features

Key Benefits	Wear Resistant, Lightweight, High Precision, Ergonomic
--------------	--

Application

Primary Applications

- Machinery extension
- Tooling guide
- General machine-tool component
