

Plastic Pipe Cutter

This tool is designed for making clean and precise cuts on plastic pipes. The cutter features a scissor-like design with a curved blade and a ratchet mechanism for controlled cutting.

Product Overview

Professional Plastic Pipe Cutting Tool

The ZSTJ42A plastic pipe cutter is a high-performance tool designed for precision in plumbing and irrigation systems. Featuring a durable aluminium alloy body, it offers a comfortable ergonomic grip and a specialized ratchet mechanism for efficient, low-effort cuts. This tool is ideal for processing PVC, CPVC, PP, and PE piping, ensuring clean edges in demanding work environments.

Technical Specifications

Model Number	ZSTJ42A
Maximum Pipe Diameter	42 mm
Body Material	Aluminium Alloy
Surface Treatment	Spraying

Blade Details

Blade Material	65Mn Steel
Blade Coating	Electroplate

Key Features

Main Characteristics	Ratchet Mechanism, Ergonomic Design, Clean Cutting, Corrosion Resistant
