

Plastic Pipe Cutter

This plastic pipe cutter is designed for making clean, square cuts on plastic pipes such as PVC, CPVC, PP, PEX, and polyethylene tubing. It features a sharp, hardened steel blade that slices through the pipe, leaving a smooth edge ready for joining.

Product Overview

Professional Plastic Pipe Cutting Solution

This high-performance plastic pipe cutter is engineered for precision and ease of use in professional plumbing and irrigation applications. Featuring a hardened steel blade and an advanced ratcheting mechanism, it delivers clean, square cuts on various plastic tubing types with minimal physical effort. Its compact, durable design ensures reliability and maneuverability, even when working in confined spaces.

Technical Specifications

Compatible Materials	PVC, CPVC, PP, PEX, Polyethylene
Blade Material	Hardened Steel
Cutting Mechanism	Ratcheting

Key Features

Key Advantages

- Clean, square cut finish
- Minimal deformation of pipe
- Compact design for tight spaces
- High leverage operation

Applications

Common Applications

Plumbing • Irrigation Systems • General Piping
