

Plastic Pipe Extrusion Line (200-3000mm)

This plastic pipe extrusion line is designed for producing pipes with diameters ranging from 200mm to 3000mm. It features a robust construction and advanced control systems for precise and efficient pipe manufacturing.

Overview

High-Performance Pipe Extrusion Line

This advanced plastic pipe extrusion line is engineered for the efficient production of large-diameter pipes ranging from 200mm to 3000mm. The system integrates a robust extruder, cooling unit, haul-off machine, and precision cutter to ensure seamless manufacturing. Additionally, it features a patented pipe connection treatment utilizing sealing strips and stainless steel clamps for superior reliability.

Technical Specifications

Pipe Diameter Range

200 mm Minimum Diameter	3000 mm Maximum Diameter
-----------------------------------	------------------------------------

Included Components

- Extruder
- Cooling System
- Haul-off Unit
- Cutting Machine

Features

Connection Treatment Technology

Patented Design, Sealing Strip, Stainless Steel Clamp
