

Plastic Solar Spotlight for Outdoor Use

This solar spotlight is made from durable plastic material and designed for outdoor use. It features an integrated solar panel for charging and is easy to install with ground stake or wall mounting options.

Product Overview

Solar-Powered Directional Lighting

This durable solar spotlight is engineered for efficient outdoor use, specifically serving electric power transmission and distribution sites. By utilizing an integrated solar panel, it functions as a standalone lighting solution without requiring external power sources. Its weather-resistant construction ensures high performance and safety in demanding environmental conditions.

Technical Specifications

Installation Methods

- Ground stake
- Wall mounting

Construction Material	Durable Plastic
Energy Source	Integrated Solar Panel
Best For	Outdoor, Power Transmission, Distribution Sites

Performance Features

Environmental Resilience

Weather-resistant • Maintenance-free
