

Plate Lifting Clamp Sets

These plate lifting clamp sets are designed for securely lifting and handling steel plates. They come in vertical and horizontal models to suit diverse material handling needs.

Overview

Versatile Plate Lifting Solutions

This comprehensive set of plate lifting clamps is engineered for the safe and efficient handling of steel plates in various industrial orientations. The collection includes specialized series for vertical and horizontal lifting, as well as clamp sets equipped with chains for enhanced stability. Designed for professional environments, these tools ensure secure gripping and reliable performance during demanding material handling operations.

Product Series

Available Clamp Series

Series Name	Function
JCD Series	Vertical Plate Clamp
JPD Series	Horizontal Plate Clamp
LTC Series	Clamps with Chains
PCD Series	Vertical Plate Clamp

Supported Lifting Orientations

Vertical, Horizontal
