

# Plated Steel Electronic Component Mounting Bracket

This bracket is made of plated steel and provides a stable mounting point. It features a central circular opening and two downward-extending arms for attachment.

## Product Overview

### Precision Mounting Solution

This plated steel mounting bracket is engineered for secure and reliable installation of electronic components. Featuring a robust design with a central circular opening and dual downward-extending mounting arms, it provides excellent stability for various assembly applications. The durable plated finish offers enhanced resistance to environmental factors, making it a dependable choice for professional electronic hardware integration.

## Physical Characteristics

### Model ID

B006

### Material

Plated Steel

### Surface Finish

Plated (Yellowish Hue)

## Design Features

### Mounting Style

- Central circular opening
- Dual downward-extending arms
- Pre-drilled mounting holes

## Applications

### Primary Use

Electronic Component Mounting, Device Securing, Hardware Assembly
