

Platform Screen Door System for Rail Stations

This platform screen door system is designed for urban rail stations. It features sliding glass doors with metal frames, enhancing safety and climate control.

Product Overview

Advanced Platform Safety Solution

This platform screen door system is engineered for urban rail stations to enhance passenger safety and station efficiency. Featuring a unique mechanical locking mechanism and redundant electrical design, the system ensures reliable operation under diverse conditions. It is optimized for energy efficiency through an advanced omni-seal mechanism, while simultaneously providing a quieter, more comfortable station environment.

Performance Metrics

Operational Noise Level

58 dB(A)

Noise Level

Manual Operation Force

66 N

Safety & Design

Safety Mechanisms

Mechanical Locking, Redundant Electrical Design, Government Approved

Efficiency Technology

Omni-seal mechanism for improved environmental control
