

Plunge Router with Adjustable Depth

This professional-grade plunge router is designed for precision woodworking. It features adjustable depth settings and integrated LED lighting for enhanced visibility.

Product Overview

Professional Precision Routing

This professional-grade plunge router is engineered for high-precision woodworking tasks. Designed with a robust metal construction, it features adjustable depth settings and ergonomic handles for superior control and comfort during extended operation. The integrated LED lighting ensures optimal visibility of the workpiece, making it an essential tool for accurate routing applications.

Key Features

Core Capabilities

- Adjustable depth control
- Integrated LED workspace illumination
- Ergonomic handle design
- Robust metal construction

Professional Grade

Professional • VSN
