

Pneumatic Air Blow Gun

This air blow gun delivers a focused stream of high-pressure air for cleaning and drying. It is used in workshops, garages, and industrial settings to remove contaminants from machinery, workbenches, and components.

Product Overview

High-Pressure Industrial Air Blow Gun

This high-pressure air blow gun is engineered for demanding industrial environments, featuring a durable stainless steel cast tube that offers excellent corrosion resistance. Designed for efficiency, it effectively removes dust, moisture, and debris from machinery and workbenches. The tool includes a high-mechanical-strength handle for durability and a built-in brass pipe joint to ensure a sturdy, long-lasting connection.

Key Features

Key Features

- Stainless steel cast tube construction
- Corrosion-resistant materials
- High mechanical strength handle
- Built-in brass pipe joint
- Effective dust and moisture removal

Logistics & Packaging

Packaging Details	Triple Wall Corrugated Carton
Shipping Lead Time	14 Days Rapid Delivery
