

Pneumatic Air Hammer with Chisel Attachments

This pneumatic air hammer is designed for demolition and cutting tasks. It features a lightweight aluminum housing, ergonomic grip, and variable speed trigger for precise control.

Product Overview

Versatile Pneumatic Demolition Tool

This pneumatic air hammer is a versatile solution designed for demanding automotive repair, metalworking, and construction tasks. It features a lightweight aluminum housing and an ergonomic grip to reduce operator fatigue during extended use. The variable speed trigger allows for precise control, making it suitable for a wide range of demolition and cutting applications.

Key Features

Housing Material

Lightweight Aluminum

Control

Variable speed trigger for precise operation

Ergonomics

Ergonomic grip for improved comfort

Applications

Primary Applications

Automotive Repair, Metalworking, Construction, Demolition, Cutting

Components

Included Attachments

- Pneumatic air hammer unit
- Multiple chisel attachments
