

Pneumatic Angle Grinder

This pneumatic angle grinder is designed for cutting, grinding, and polishing. It features a robust air motor for efficient material removal and a compact design for maneuverability.

Overview

High-Performance Pneumatic Angle Grinder

This high-performance pneumatic angle grinder is expertly designed for demanding tasks including cutting, grinding, and polishing across various materials. Built with a robust air motor, it ensures efficient material removal while maintaining a compact form factor for superior maneuverability in tight spaces. The tool prioritizes operator safety and comfort, featuring an integrated safety lock lever to prevent accidental start-ups and an ergonomic handle suitable for extended use.

Technical Specifications

Operating Pressure	90 PSI
Free Speed	11000 RPM
Air Inlet Size	1/4 inch
Disc Diameter	4 in

Features & Safety

Safety Features	Safety Lock Lever, Adjustable Guard
Ergonomic Design	Yes

Applications

Recommended Applications

- Metalworking
- Automotive Repair
- Construction
- Cutting
- Grinding
- Polishing
