

Pneumatic Banknote Counter with Counterfeit Detection

This pneumatic banknote counter utilizes advanced technology for precise and rapid counting of banknotes. It features counterfeit detection capabilities, including UV and MG sensors, to ensure accuracy and reliability.

Product Overview

High-Performance Cash Management

This pneumatic banknote counter is engineered for high-speed, high-accuracy processing in environments with substantial cash volumes. By leveraging advanced pneumatic technology, the device ensures precise counting while minimizing operational errors. It is a robust solution designed to streamline cash handling for financial institutions and large businesses.

Core Performance

Operating Modes

- Batch counting
- Adding
- Preset counting

Security Features

UV Detection, MG Detection

Operational Interface

User Experience

User-Friendly • High-Speed • High-Accuracy

Interface

Digital display with intuitive controls
