Product Overview

Professional Coil Siding Nailer

This pneumatic coil siding nailer is engineered for high-performance fastening, featuring a durable, high-strength aluminum alloy die-cast body that withstands demanding environments. It utilizes advanced heat-treatment technology for the nail head and striker, ensuring exceptional wear resistance and a firing pin lifespan exceeding 300,000 cycles. Designed with user safety and efficiency in mind, the tool includes adjustable firing modes, a safety trigger mechanism, and depth control to accommodate various material hardness levels.

Technical Specifications

Nail Specifications

Feature	Specification
Nail Length	25-65 mm
Nail Diameter	2.1-2.3 mm
Nail Cap Diameter	5.7 mm
Wire Coil Capacity	300 nails
Plastic Coil Capacity	200 nails

Performance Metrics

300000 cycles

Firing Pin Life

0.03 %

Nailing Failure Rate

Key Features

Safety & Durability

- Safety frame triggers only at twice the gun body weight
- Aviation-grade bumper for wear resistance
- TPE handle sheath for cold-weather comfort
- 360-degree adjustable exhaust cover
- Never-wear gasket design

Build Quality

High-strength Aluminum Alloy • German Ipsen Heat-Treated Components • TPE Grip

Firing Modes

Sequential Fire, Bump Fire
