

Pneumatic Corner Rounding Machine

This corner rounding machine utilizes a pneumatic cylinder for precise corner cutting on various materials. It features a foot pedal for hands-free operation and includes guides for accurate material placement.

Product Overview

Industrial Pneumatic Corner Rounding

This pneumatic corner rounding machine is engineered for high-volume industrial applications requiring precise and consistent material shaping. Featuring a robust construction for stability, it utilizes a pneumatic cylinder to ensure high-quality cutting performance. The inclusion of a foot pedal allows for hands-free operation, enhancing workflow efficiency and ease of use for operators.

Technical Specifications

Operation Mode	Pneumatic
Control Mechanism	Foot pedal (hands-free)
Design Features	Pneumatic cylinder, Robust construction, Precision guiding rails

Usage & Application

Intended Use

Industrial Application • High-Volume Production • Corner Rounding

Usability Highlights

- Compact and portable design
- Includes guiding rails for accurate material placement
- Designed for consistent cutting precision
