

Pneumatic Fastening Tool

This pneumatic tool is designed for various fastening applications. It operates on compressed air, providing consistent power and performance for construction, woodworking, and upholstery projects.

Overview

Professional Pneumatic Fastening Solution

This professional-grade pneumatic fastening tool is engineered for high-efficiency performance in construction, woodworking, and upholstery applications. It features a durable, robust construction paired with an ergonomic grip to ensure comfort during extended use. Equipped with a high-capacity magazine and a contact trip safety mechanism, this tool delivers consistent power and reliable operation for demanding fastening tasks.

Technical Specifications

Max Operating Pressure

120 PSI

Max PSI

8.3 BAR

Max Bar

Model Number

8016A

Fastener Size Range

15-40mm

Certifications & Safety

Safety Features

- Contact trip mechanism
- Accidental firing prevention

Certifications

CE

Features

Key Features

Durable Construction • Ergonomic Grip • High-Capacity Magazine
