

Pneumatic Ferrule Crimping Tool

This pneumatic ferrule crimper is designed for ferrules ranging from 0.25 to 35 sqmm. It is powered by an air compressor and can crimp different terminals by easily changing the crimping die sets, offering portable, productive, and easy operation.

Product Overview

High-Efficiency Pneumatic Crimping

The FEK-30J is a versatile, air-powered crimping machine designed for high-volume wire termination tasks. Featuring a compact and portable design, it delivers consistent crimping performance with an output force of 2.0 tons. Equipped with an integrated pressure regulator, this tool ensures precision and reliability for industrial applications, capable of achieving up to 1200 crimping cycles per hour.

Technical Specifications

Model Number	FEK-30J
Net Weight	4.8 kg
Output Force	2 T
Air Pressure Scope	0.5-0.7 MPa
Dimensions	286 x 125 x 165 mm

Performance Metrics

Production Capacity

1200 pcs/h

Cycles per Hour

Features

Key Features

- Interchangeable crimping die sets
- Integrated pressure regulator
- Portable bench-top design
- Pneumatic operation
- Foot switch control options

Certifications

Compliance

CE • SGS
