

Pneumatic Framing Nailer

This pneumatic framing nailer is designed for heavy-duty construction applications. It is compatible with standard framing nails and delivers consistent performance for framing and sheathing.

Product Overview

Professional Framing Performance

This pneumatic framing nailer is engineered for heavy-duty construction applications, offering reliable performance for framing, sheathing, and various wood fastening tasks. Built with a durable aluminum housing, it combines longevity with a comfortable grip designed for extended use on the job site. The tool features adjustable depth control and versatile trigger options, ensuring precision and flexibility for professional builders.

Technical Specifications

Housing Material	Aluminum
Actuation Modes	Sequential, Contact
Depth Adjustment	Yes

Applications

Common Applications

- Framing
- Sheathing
- General Wood Fastening
