

Pneumatic Grippers

These pneumatic grippers are designed for automated pick-and-place applications. They feature a robust construction ensuring reliable performance in demanding industrial environments.

Product Overview

SH Series Pneumatic Grippers

The SH series gas fingers are precision-engineered components designed for automated pick-and-place applications. Featuring a compact and robust construction, these grippers ensure reliable performance in demanding industrial environments. They offer high gripping force and precise positioning for a wide range of workpiece handling tasks, making them ideal for robotics and assembly line integration.

Technical Specifications

Performance Features

- High gripping force
- Precise positioning
- Durable construction
- Compact design

Recommended Applications	Robotics, Assembly Lines, Pick-and-place, Automation Systems
Series Name	SH Series
