

Pneumatic Jalousie Control Box

This control box is designed for pneumatic remote opening and closing of jalousies on ships and land. The unit offers flexible, reliable operation and convenient installation.

Product Overview

CPJ Series Pneumatic Control Box

The CPJ series control box is engineered for the reliable pneumatic remote operation of jalousies in both marine and land-based applications. Designed for durability and ease of use, this unit features a robust construction that ensures flexible operation and straightforward installation. Its integrated governor allows for precise control over the opening and closing speeds, providing efficient performance in demanding environments.

Technical Features

Operational Benefits

- Flexible and reliable operation
- Convenient installation
- Adjustable opening and closing speed
- Rapid pneumatic actuation

Design & Build

Corrosion Resistant • Reinforced Steel Frame • Compact Housing

Primary Applications

Marine, Land-based, Pneumatic Jalousie Systems

Operation

Control Method

Manual control valve operation with integrated speed governor
