

Pneumatic Marking Machine

This pneumatic marking machine offers laser precision for diverse applications. It features a print range of 150x90 mm.

Overview

Precision Marking Solution

This pneumatic marking machine is designed for high-precision, permanent marking on a wide variety of material surfaces. By utilizing advanced marking technology, it creates exquisite patterns, trademarks, and characters through precise surface material evaporation. It is an ideal solution for industries requiring fine detail and high accuracy, such as electronics, jewelry, and automotive components.

Technical Specifications

Available Models

- C-05
- C-09
- C-12

Print Range

150x90 mm

Applications

Suitable Industries

Electronic Components, Integrated Circuits, Electrical Appliances, Mobile Communication, Hardware, Precision Instruments, Jewelry, Automotive, Building Materials

Compatible Materials

Metals, Plastic, PVC
