

Pneumatic Marking Machine

This pneumatic marking machine is a versatile tool for precisely marking various materials. Adjustable settings for depth and speed ensure optimal marking quality.

Overview

Industrial Marking Solution

The Pneumatic Marking Machine is a versatile tool engineered for precision marking across a wide range of industrial materials, including metals and plastics. It features adjustable settings for depth and speed, ensuring consistent, high-quality results for every application. Built with a robust construction and a user-friendly control panel, this machine is designed for reliable performance in demanding industrial environments.

Technical Specifications

Available Models

Model	Print Range (mm)
A-15	140x80
A-17	200x120
A-29	300x200

Marking Capabilities

Metal, Plastic, Permanent Marking, Adjustable Depth, Adjustable Speed

Applications

Primary Applications

- Electronic components and Integrated Circuits (IC)
- Electrical appliances
- Mobile phone communication devices
- Hardware products and tool accessories
- Precision instruments
- Jewelry and watch accessories
- Automobile accessories
- Plastic buttons
- Building materials and PVC pipes
