

Pneumatic Metal Cutting and Bending Machine

This cutting and bending machine is designed for precise metal forming tasks. It features a pneumatic cutting mechanism and adjustable guides for accurate bending.

Product Overview

Precision Metal Forming Solution

The LZJ-120A is a professional-grade pneumatic machine engineered for efficient metal cutting and bending operations. Designed with a robust frame for stability, it incorporates a pneumatic cutting mechanism and intuitive foot-pedal control to streamline production workflows. The inclusion of adjustable guides and stops ensures consistent, high-precision results for various metal forming tasks.

Technical Specifications

Key Machine Features

- Robust frame construction
- Pneumatic cutting mechanism
- Adjustable guides and stops
- Integrated side-mounted electrical control box

Performance Highlights

120 A

Model Capacity Indicator

Model Number

LZJ-120A

Operation Type

Pneumatic, Foot Pedal Operated
