

Pneumatic Narrow Crown Stapler

This pneumatic tool drives narrow crown staples efficiently. Its lightweight design ensures comfortable handling for applications like furniture assembly and cabinet making.

Overview

Professional Narrow Crown Stapler

The 422J-4 pneumatic narrow crown stapler is a versatile tool engineered for efficiency in furniture assembly, cabinet making, and general construction tasks. Featuring a lightweight, durable construction, it is designed to minimize user fatigue while maintaining performance in demanding work environments. The tool incorporates essential features such as a quick-release nose for rapid jam clearing and adjustable depth control for precise staple placement.
