

Pneumatic Orbital Sander

This pneumatic tool is designed for sanding and polishing surfaces. It utilizes compressed air to power its orbital motion, providing efficient material removal and a smooth finish.

Product Overview

Professional Performance

This pneumatic orbital sander features a robust aluminum alloy and composite housing designed for durability in demanding industrial environments. Equipped with high-quality imported balance shaft bearings, it offers extended work life and superior pressure durability. The ergonomic, 360-degree swivel design ensures maximum operator comfort and maneuverability during intensive polishing tasks.

Technical Specifications

Advanced Features

- Japan import integrated balance shaft bearing
- Dust-resistant shaft and front cover
- Adjustable air regulator
- 360-degree swivel air inlet

Construction Materials

Aluminum Alloy, Composite Housing, Alloy Steel

Applications

Compatible Materials

- Metal
- Wood
- Plastic

Common Industries

Automotive Repair, Furniture Manufacturing, Shipbuilding, Construction, Metal Hardware
