

Pneumatic Orbital Sander for Surface Preparation

This pneumatic orbital sander is designed for smooth and efficient surface preparation. It features a compact and lightweight design for comfortable handling and maneuverability.

Product Overview

Professional Surface Preparation

This pneumatic orbital sander is engineered for smooth and efficient surface preparation in demanding industrial environments. Its compact, lightweight design ensures superior maneuverability and operator comfort during extended use. Utilizing compressed air for consistent orbital motion, it delivers uniform sanding results across various materials. The system features an easily replaceable sanding pad, facilitating quick transitions between different grit sizes for automotive body work, woodworking, and finishing tasks.

Technical Specifications

Power Source	Compressed Air
Ideal Applications	Automotive Body Work, Woodworking, Surface Finishing

Design Features

Key Design Features

- Compact and lightweight construction
- Ergonomic handling
- Durable industrial-grade build
- Quick-change sanding pad system
