

Pneumatic Paint Spray Gun with Adjustable Flow

This pneumatic spray gun is equipped with a metal paint reservoir and adjustable spray pattern. Its durable plastic handle ensures comfortable grip and extended use for various coating applications.

Product Overview

Precision Coating Solution

This pneumatic paint spray gun is engineered for versatile coating applications, offering users consistent and precise results. It features an integrated adjustable flow control and spray pattern mechanism to accommodate various project requirements. The durable construction includes a metal paint reservoir and an ergonomic plastic handle designed for comfort during extended professional use.

Technical Specifications

Adjustment Features

- Adjustable spray pattern
- Flow control

Application Usage

Pneumatic • Coating • Painting

Material Construction

Metal Reservoir, Durable Plastic Handle
