

Pneumatic Ribbed Tread Tire

This pneumatic tire is suitable for various industrial and commercial applications. Its durable rubber construction ensures longevity and resistance to wear, providing excellent load-bearing capacity and smooth rolling performance.

Product Overview

Industrial Pneumatic Ribbed Tire

This high-quality pneumatic tire is specifically engineered for diverse industrial and commercial applications. Built with durable rubber construction, it offers superior longevity and resistance to wear, ensuring reliable performance under demanding conditions. The precision-engineered ribbed tread pattern delivers optimal grip and traction, while its design supports heavy load-bearing capacities for carts, dollies, and material handling equipment.

Technical Specifications

Tread Design	Ribbed
Material	Industrial-grade rubber

Features

Key Performance Attributes	Wear Resistant, High Load-Bearing, Smooth Rolling, Easy Installation
----------------------------	--

Application Suitability

Ideal For

- Industrial Carts
- Dollies
- Material Handling Equipment
