Product Overview

Professional Pneumatic Valve Lapper

This pneumatic spin valve grinding machine is engineered for heavy-duty engine repair applications. Built to withstand demanding workshop environments, it features an adjustable speed regulator for maximum precision during operation. The kit includes a comprehensive set of rubber suction caps to ensure compatibility with a wide range of valve diameters.

Technical Specifications

Operating Speed

3000 rpm

Rotation Speed

Maximum Valve Diameter	45 mm
Air Consumption	100 l/m
Hose Inner Diameter	10 mm

Equipment & Accessories

Included Rubber Caps

- 20
- 30
- 35
- 45

Key Features	Adjustable Speed, Tough Environment Design, Portable, Precise Control
