

Pneumatic Spray Cleaning Machine

This pneumatic cleaning machine is designed for efficient cleaning applications. It utilizes compressed air to deliver a powerful spray, making it suitable for removing dirt, grease, and other contaminants from various surfaces.

Overview

High-Efficiency Pneumatic Cleaning

This pneumatic cleaning machine is engineered for superior performance in removing dirt, grease, and contaminants from a variety of surfaces. Built with robust construction for durability, it utilizes compressed air to deliver a powerful, controlled spray. Its ergonomic design and adjustable nozzle ensure precise handling and optimized cleaning efficiency for professional applications.

Key Features

Design Advantages

- Robust construction for long-lasting performance
- Ergonomic design for comfortable handling
- Adjustable nozzle for customized spray patterns

Suitable Applications

Automotive, Industrial, Household

Technical Details

Cleaning Capability

Dirt Removal • Grease Removal • Contaminant Cleaning

Operation Method

Compressed Air
