

Pneumatic Steel Strapping Combination Tool

This pneumatic combination tool integrates tensioning, sealing, and cutting functions for steel strapping. It is designed for strapping applications using 19mm steel strapping with 10KN tension or 32mm steel strapping with 13KN tension.

Product Overview

High-Efficiency Pneumatic Combination Tool

This pneumatic combination steel strapping tool is designed for heavy-duty industrial applications requiring high tension and secure sealing. It integrates tensioning, sealing, and cutting functions into a single, efficient unit powered by compressed air for consistent performance. The tool is ideal for securing steel coils, bundles, and heavy packages, featuring adjustable tension settings for optimal load stability and a robust construction for demanding environments.

Technical Specifications

Compatibility Matrix

Feature	High Tensile Tensioners	High Tensile Sealers
Widths	16mm, 19mm, 25mm, 32mm	16mm, 19mm, 25mm, 32mm
Thickness	0.9mm	0.9mm
Fits Strapping Seal	N/A	16mm, 19mm, 25mm, 32mm

Supported Strap Widths 16mm, 19mm, 25mm, 32mm

Strap Thickness 0.9 mm

Key Features

Operational Highlights

- Integrated tensioning, sealing, and cutting
- Pneumatic power for consistent reliability
- Adjustable tension settings
- High-strength sealing mechanism
- Ergonomic handle design
- Quick-release cutting system
