

Pneumatic Straight Die Grinder for Grinding and Polishing

This pneumatic straight die grinder is a versatile tool designed for grinding, deburring, and polishing various materials. Its compact and lightweight design allows for easy maneuverability in tight spaces.

Product Overview

Professional Pneumatic Straight Die Grinder

This pneumatic straight die grinder is a versatile tool engineered for precision grinding, deburring, and polishing across various industrial materials. Designed with a compact and lightweight frame, it offers exceptional maneuverability, making it ideal for operation in tight or restricted spaces. Built with a durable housing and a high-speed motor, this tool ensures efficient material removal for demanding applications in automotive, metalworking, and construction sectors.

Technical Specifications

Maintenance

- Daily lubrication required
- Oil regularly for optimal performance

Power Source

Compressed Air

Application & Usage

Primary Functions

Grinding • Deburring • Polishing

Suitable Industries

Automotive, Metalworking, Construction
