

Pneumatic Terminal Crimping Press

This numerical control precision press is designed for terminal crimping applications. It operates using compressed air at 0.5MPa and features adjustable stripping length from 2.0 to 4.0mm and is suitable for wire sizes ranging from AWG#18 to 32.

Product Overview

Precision Terminal Crimping Solution

The SATC-20B is a high-precision numerical control pneumatic press designed for efficient terminal crimping applications. It utilizes compressed air for consistent, repeatable force, ensuring reliable terminations. With its versatile adjustment features, this machine is an ideal choice for professional assembly lines requiring precision for small-gauge wiring.

Technical Specifications

Operating Pressure

0.5 MPa

Air Pressure

Control System

Numerical Control

Stripping Length

2.0 - 4.0 mm

Compatible Wire Sizes

AWG #18, AWG #32
