

# Pneumatic Tire Roller Compactor

This tire roller is a heavy-duty compaction machine designed for asphalt and soil compaction. It features multiple pneumatic tires for uniform pressure distribution and a comfortable operator cabin.

## Overview

### Performance and Design

The XG6301P tire roller is a heavy-duty compaction machine engineered for high-performance asphalt and soil compaction. Designed for versatility in road construction and civil engineering, it features a robust chassis and an intelligent pneumatic tire layout to ensure uniform surface pressure. With a focus on operator safety and efficiency, this machine combines powerful hydraulic drive systems with intuitive controls for demanding infrastructure projects.

## Key Performance Metrics

### Operational Efficiency

**6301**

Model Series

## Technical Specifications

Drive System	Hydraulic drive system
Engine Type	Diesel
Tire Configuration	Multiple pneumatic tires

## Features and Safety

### Core Features

- Adjustable tire pressure
- Wide rolling width
- Comfortable operator cabin
- High maneuverability

Safety Equipment	Emergency stop, Rollover protection
