

# Pneumatic Wet Stone Sander Polisher

This pneumatic tool is designed for wet sanding and polishing. It utilizes a water-feed system to keep surfaces cool and reduce dust during operation.

## Product Overview

### Professional Wet Stone Polishing

This pneumatic wet sander and polisher is engineered for high-quality stone and marble finishing. By integrating a water-feed system, it effectively eliminates dust during operation, protecting the operator and ensuring a cleaner working environment. Designed for precision, it features adjustable air and water controls, making it an ideal choice for laminating, trimming, and polishing stone surfaces.

## Performance Metrics

### Free Speed

**4500 rpm**  
Free Speed

### Avg. Air Consumption

**5 cfm**  
Air Consumption

## Technical Specifications

Backing Pad Size	4 inch
Working Pressure	90 Psi / 6.3 Bar
Spindle Size	M14 x 2 / 5/8-11UNC
Air Inlet	1/4 inch
Air Hose (ID)	3/8 inch

## Features

### Key Features

- Integrated water-feed system for dust-free operation
- Auxiliary handle mountable on either side
- Side-mounted water control knob
- Side-mounted air regulating knob
- Rear exhaust system

## Applications

### Best For

Marble Finishing, Stone Polishing, Laminating Stone, Trim Work
