

Pneumatic Wheel with Rubber Tire

Pneumatic wheel with a durable rubber tire and a robust metal hub, designed for smooth rolling and load-bearing applications in industrial and machinery settings.

Product Overview

Industrial Pneumatic Wheel Solution

This pneumatic wheel features a high-quality rubber tire engineered for consistent performance in demanding industrial environments. The design incorporates a robust metal hub to ensure reliable load-bearing capacity and stability during operation. It is an ideal component for machinery and material handling equipment, providing smooth rolling motion on various surfaces.

Technical Specifications

Wheel Type

Pneumatic • Industrial

Suitable Applications

- Industrial machinery
- Material handling equipment
- Warehouse logistics
- Heavy-duty transport

Material Composition

Rubber Tire, Metal Hub
