

Pneumatic Wheelbarrow with Steel Tray

This wheelbarrow is designed for landscaping and construction use. It features a durable metal tray, sturdy steel frame, and pneumatic tire for smooth maneuverability.

Product Overview

Robust Utility Wheelbarrow

This durable wheelbarrow is engineered for demanding landscaping and construction environments. Featuring a high-capacity steel tray and a reinforced tubular frame, it provides exceptional stability for hauling heavy materials like soil, gravel, and mulch. The integrated pneumatic tire ensures smooth maneuverability across uneven terrain, while the ergonomic handle design enhances user comfort and control during operation.

Technical Specifications

Wheel Type	Pneumatic
Frame Material	Tubular Steel
Tray Material	Steel

Features

Key Benefits

- Ergonomic handle design for improved control
- Pneumatic tire for terrain versatility
- Durable steel construction for heavy loads
- Stable tubular frame design

Primary Applications	Landscaping, Construction, Material Handling, Gardening
