

Pocket Thermometer for Food and Industrial Use

This pocket thermometer is designed for general temperature checking in food processing, industrial, heating, ventilating, refrigeration, agriculture, and pharmaceutical applications. It is shock resistant for reliable use in various environments.

Overview

Professional Pocket Thermometer

This durable pocket thermometer is designed for precise temperature measurement in both food safety and industrial applications. Featuring a robust stainless steel stem and a shock-resistant design, it ensures reliability in demanding environments like HVAC&R and refrigeration. Each unit is individually calibrated to guarantee accuracy for professional use.
