

Point of Sale Terminal with Integrated Cash Register

This point-of-sale terminal integrates a cash register for efficient transaction processing. It is designed for use in retail and business environments, providing a comprehensive solution for managing sales and customer interactions.

Product Overview

Integrated POS Solution

This Point of Sale (POS) terminal is a comprehensive, all-in-one system designed specifically for retail and commercial business environments. It streamlines transaction processing by combining a robust operator interface with a dedicated customer-facing display. The unit includes an integrated keyboard and receipt printer, ensuring a compact and efficient footprint for any service counter.
