Product Overview

Industrial Multi-Speed Induction Motor

The YD series three-phase induction motor is a robust solution designed for industrial applications requiring variable speed operation in stages. It offers excellent performance and high interchangeability with international standards, serving as a versatile replacement for complex reduction gearboxes. These motors support flexible operation with configurations available in double, three, and four-speed variants.

Technical Specifications

Protection Class	IP44
Speed Configurations	Double Speed, Three Speed, Four Speed

Industrial Applications

Common Industrial Uses

- Mechanical machinery
- Mining equipment
- Metallurgy
- Textiles
- Printing and dyeing
- Chemical industry
- Agricultural machinery
