

Polished Metal Mounting Plate

This metal plate is designed for mounting and securing components. Its polished surface provides corrosion resistance and an attractive appearance.

Product Overview

Professional Mounting Solution

This polished metal mounting plate is engineered for versatility and durability in various assembly applications. Featuring a sleek, rounded-edge design and a central aperture, it provides both structural support and a refined aesthetic finish. Its high-quality surface treatment ensures excellent corrosion resistance, making it an ideal choice for furniture, machinery, or architectural hardware projects.

Technical Specifications

Surface Finish

Polished • Corrosion Resistant

Design Features

- Central mounting aperture
- Rounded edge profile
- Polished metallic finish

Shape Profile

Square with rounded edges

Application

Common Applications

Furniture Assembly, Industrial Machinery, Architectural Hardware, Mounting & Securing
