

# Polishing Wheel for Surface Finishing

These polishing wheels are designed for various finishing applications. They feature layered construction for durability and consistent performance, with a center mount for easy attachment to polishing machines.

## Product Overview

### Professional Surface Finishing Solutions

These polishing wheels are engineered for high-performance surface finishing, buffing, and preparation tasks. Featuring a durable, layered construction, they ensure consistent performance across various industrial applications. Designed with a universal center mount, these wheels integrate seamlessly with standard polishing machinery to deliver reliable results.

<b>Primary Applications</b>	Metal Polishing, Buffing, Surface Preparation
-----------------------------	---

## Technical Specifications

### Available Variants

- Multiple Materials
- Various Textures

<b>Construction</b>	Layered
<b>Mounting</b>	Center Mount
